Suppose you are developing a drawing application that allows users to create complex shapes by combining simple shapes like circles and rectangles. You want to implement a feature that allows users to group multiple shapes together and treat them as a single object. Which design pattern would you use to implement this feature?
Factory Pattern
Composite Pattern
State Pattern
Observer Pattern
Singleton pattern
Factory pattern
-Design Patterns (Singleton)
-Sdlc phases (waterfall,Agile,scrum)
design patterns
SDLC
what are methods to get requiremnts from clint.
if you have limited time and unclear req how you start project?
cloud computing
Box model in css
Association / Composition / Aggregation
What is singleton Pattern?
- Design patterns
Factory and Singleton
Design Pattern
Singleton Pattern implementation without static keyword, it's real life example
Q2: what is Singleton design pattern and how do we implement it?
Q3: Explain Observer design pattern
How can we measure the size of project
What is agile and xp
What are the non-functional requirements of a project give some examples
What is the most important stage of waterfall model
Functional points in project
Some questions from design pattern and
Design patterns thy 2 observer and pub/sub
11. what is Singleton design pattern and how do we implement it?
12. Observer design pattern.
-Singleton pattern with use case
Solid Principals
Factor pattern?
MVC
ADO.NET
EF

Q2: what is Singleton design pattern and how do we implement it?
Q3: Explain Observer design pattern
SDLC (phases and models)
design pattern and singleton design pattern
Design patterns (Waterfall model, protyping, spiral model)
Create a UML Class Diagram for a Hospital that manages patients, appointments and treatment plans
TCP and UDP in Computer networks
What is DNS
If you type google.com what actually happens behine it how it works?
OSI Model
Can you tell the worrking of every layer
What is protocol
TCP vs UDP
Networking layers
Stack overflow ka error q ata h
Kernal kia krta h
design pattern konsa ata he (singleton ata tha -> code likhwaya)
Modify singleton code so that only 3 instances can be created.
Architecture of FYP
What is singleton Pattern? Write its code
SDLC?
Factory method
Singleton and Factory Pattern Along with code
