If you are learning HTML and CSS for the first time, then project one is not for you. You have to cover till video 10. Hopefully, beginners can easily cover HTML but might face some difficulty in learning CSS. Feel free to contact me in this regard. Also first discuss your doubts in the group. We also conduct some live sessions separately for extreme beginners, so they can start building projects. Must practice exercises on w3school after watching tutorials.

Html Fundamentals

Video 7:
Watch this foundation video if you do not know HTML. If you already know then skip this video.

Ap es 4-hour tutorial se learn kr learn kr le agr ap ko inka way of teaching asha lagta ha.
